

INSTRUCTIONS TO AUTHORS

Authors may submit manuscripts in PDF format on-line at the Submissions page (temporary please submit to benzoni@ucsd.edu)

Originality

Submission of a manuscript acknowledges that the manuscript is original and is not under consideration elsewhere, nor has it appeared in substantially similar form in another publication including proceedings.

Language

Manuscripts must be in English. A brief abstract of about 150 words or less must be included. The abstract should be self-contained and not make any reference to the bibliography. Also required are keywords for the article, and, for each author, postal address, affiliation, and email address. A home-page URL is optional.

Format

Authors can use their preferred typesetting software. The journal is produced in LaTeX, and authors wishing to prepare their document in LaTeX can, but are not required to.

At submission time only a PDF file is required. After acceptance, authors must submit all source material (see especially Figures below).

References

Bibliographical references should be complete, including article titles and page ranges. All references in the bibliography should be cited in the text. Cite in the text by author and date set in brackets (e.g., [Smith, 2000]). Prepare reference list alphabetically and in accordance with the following examples:

Journal:

Kelly, J.M. and Tsai, H.C. [1985] "Seismic response of light internal equipment in base-isolated structures," *Int. J. of Earthquake Engineering and Structural Dynamics*, 13, no. 6, 711-732

Book:

Skinner, R.I., Robinson, W.H. and McVerry, G.H. [1993] *An Introduction to Seismic Isolation*, John Wiley & Sons, Inc., New York

Proceedings Reference:

Priestley, M.N.J. and Seible, F. [1994] "Seismic assessment of existing bridges," *Proc. Of the Second International Workshop on the Seismic Design of Bridges*, Vol. 2, Queenstown, New Zealand, pp. 46-70

Links will be provided to all literature with known web locations;

Figures

Figures must be of publication quality. After acceptance, you will need to submit the original source files in vector format for all diagrams and graphs in your manuscript: vector EPS or vector PDF files are the most useful. (EPS stands for Encapsulated PostScript.)

Most drawing and graphing packages -- Mathematica, Adobe Illustrator, Corel Draw, MATLAB, etc. -- allow the user to save files in one of these formats. Make sure that what you're saving is vector graphics and not a bitmap. If you need help, please write to graphics@mathscipub.org with as many details as you can about how your graphics were generated.

If you are unable to save Excel-generated plots in vector format please send the Excel (.xls) spreadsheets.

Bundle your figure files into a single archive (using zip, tar, rar or other format of your choice) and upload on the link you been given at acceptance time.

Each figure should be captioned and numbered so that it can float. Small figures occupying no more than three lines of vertical space can be kept in the text ("the curve looks like this:"). It is acceptable to submit a manuscript with all figures at the end, if their placement is specified in the text by means of comments such as "Place Figure 1 here". The same considerations apply to tables.

White Space

Forced line breaks or page breaks should not be inserted in the document. There is no point in your trying to optimize line and page breaks in the original manuscript. The manuscript will be reformatted to use the journal's preferred fonts and layout.

Proofs

Page proofs will be made available to authors (or to the designated corresponding author) at a Web site in PDF format. Failure to acknowledge the receipt of proofs or to return corrections within the requested deadline may cause publication to be postponed.
